# Modern comfort for your patients

# The new UniversalLine2 – all important functions with a high standard of equipment and design

Pre-programmed seating position for entry and exit

Quick adjustment of armrests

Optimal, individual relaxation through individually adjustable segments

Fast shock position in case of emergency

The new UniversalLine2 is ideal for outpatient care of your patients.

The modern design, the high-quality materials and the very careful workmanship underline the high standard of this comfortable therapy chair. In addition, it offers flexible application possibilities for almost every patient, thanks to the four motors.

The UniversalLine2 has been designed with all the functions required in practice in mind, with particular emphasis on the good price/performance ratio.

The colour of the therapy chair can be adapted to the furnishing of your ward thanks to the many different colours and the chic bi-colour design. In addition to the colour samples on the right, other colours are also available. Please contact us for the extensive colour chart.

The armrest is swivelled to the side intuitively and simply with the aid of the lever, and can be lowered forwards for optimum positioning.

The comfortable pillow can be individually adjusted in height with a star screw.

The illuminated hand control has a clear design and allows easy adjustment of the individual segments.

The large red footswitch allows quick adjustment of the shock position from both sides - the nursing staff's hands remain free for the patient.

Atoll	Royal
Orchid	Cyclame
Cherry	Carneol
Mint	Chrome (Standard)

The four motors are positioned directly under the removable seat for easy servicing.

The manually adjustable footrest gives both small and large patients a safe feeling during treatment.

Equipotential bonding according to EN 60601 increases safety for your patients.
